6/24 Call w/ CPH - Risk Assessments
Human Health

(1) #16B - they will explain

(2) #16C - will expand Table 3-7 to include this info., in part, and include a brief write up of findings.

Not Responsive

(3) Include iron or not? We still need to get back to them.

(4) #44 - they'll look at all the samples and try to address.

(5) #82 - okay, they'll develop a master CORC list and get back to us on MD issue based on species w/ most CORCs

Sarah - (6) #42 - what do we want for a report? Their data summary reports aren't published either

* They need the Berry's Creek Data +
UOP Report Electronically (If this is
it) ... or relevant QAPP.

^{check with call} EPA #12^{cont} - Review report for interpretation
rather than just statement of numbers ^{see 122c}

⑦ Surrogate - Maria was going to provide more info.
on air + trans ... still waiting for response

⑧ Uncertainty Section

#127 date - USDA # includes both consumer
non-consumers, water quality # also use
different assumptions → obfuscate the
issue. CPH will review/discuss

→ #130 - What if they add the word
example to the table? Make it clear
that these percentages are just examples.

→ I'll discuss w/ Maria

→ Can they leave the table

→ #142 - Can they leave in Assumption of No
Degradation section? Maria will review?

→ #145 + #146 - Maria and I to discuss,
not driving risk, may lead to
under or over estimates of risk... very
uncertain.

→ #151 - last part of comment → Maria will
check w/ ORD about what they are
comfortable with saying

→ #154 - Do we want all bullets removed or not?
Maria will review
